OnSolve Risk Intelligence

AI-powered threat detection to protect your people and keep your organization running

In today's dynamic risk landscape, organizations face a wide range of physical threats, expected and unexpected, that have the potential to impact operations and employee safety. Identifying, assessing and understanding these risks can be overwhelming for security teams and analysts. Having visibility into your risks is critical, yet it's impossible for humans to continuously review and interpret endless amounts of data independently.

That's where AI-powered OnSolve® Risk Intelligence steps in. It combines the speed of automated detection with human validation to streamline data processing and filter through vast amounts of information. As a result, it delivers timely, credible insights, accelerating discovery of risks to ultimately accelerate recovery from disruption.

Our AI continuously monitors data sources in over 30 languages worldwide, providing transparent, consolidated event reports and freeing risk teams from repetitive manual tasks. It tracks over 50 categories of risk (more than any other provider in the industry), identifying more than 20,000 events daily. As the frequency of threats continues to intensify, security leaders need technology designed to help focus efforts where they matter most and enhance operational resilience.

Designed and Supported by People, Powered by AI

Our approach to AI and Machine Learning allows organizations to become more proactive while improving their ability to respond quickly to crises.

As AI adoption for critical event management grows, it can be difficult to know when data should be trusted. Our team of data scientists and risk analysts is tasked with monitoring our AI, properly vetting every data source we rely on and establishing stringent criteria for data quality and integrity.

Risk Intelligence can help with:

Early event detection	Accurate, more focused alerts	Continuous monitoring

Your Partner in a Crisis

The unified OnSolve Platform hosts a suite of products to support organizations through every step of a critical event, from preparation to detection to activating response teams and recovery.

Prepare

with risk assessments, historical trends and statistics before anything even happens.

Detect

threats early with accurate, focused alerts and impact assessments.

Activate

teams by disseminating information needed to mobilize quickly.

Recover

faster with the right technology to better understand, handle and mitigate risk.

FORRESTER WAVE LEADER 2023 Critical Event Management Platforms

OnSolve Named a Leader in the Forrester Wave™: Critical Event Management Platforms, Q4 2023

Discover the OnSolve Difference

Finding technology that aligns with your goals, objectives and size can be challenging, but discovering a true partner committed to your success is entirely different.

✓ **Anticipate potential risks before they happen**

Stay ahead by using historical physical threat data to uncover trends and statistics in specific geographical locations to evaluate past behaviors and project future possibilities.

✓ **Detect actual threats to your people and operations**

Our AI monitors data sources around the world to identify threats to your organization, so you can focus on responding to them.

✓ **Gain a complete operating picture**

Once a threat is detected, AI generates an event report with transparent data sources dynamically updated to provide organizations with a complete picture of the impact.

✓ **Protect people wherever they are located**

Don't lose sight of employees when they're traveling with travel intelligence and monitoring to help ensure their safety and well-being.
