

# OnSolve® CodeRED® Alerts Give Residents Critical Time to Seek Shelter

## The Challenge

Fifteen years ago, a rural U.S. county decommissioned its tornado sirens, which can be difficult for residents to hear indoors or when in remote locations and are also cost-prohibitive to install and maintain. The county chose CodeRED to deliver timely public safety alerts and warning messages to help keep its more than 25,000 residents informed and safe – not only for severe weather emergencies, but for any other critical event as well.

## Customer's Industry

County Office of  
Emergency Management

## Customer's Clients

Residents, employees and  
visitors of the county

## Product Used

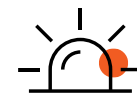

CodeRED

## How Did OnSolve Help?

### Modern Messaging

County relies on CodeRED to send the most critical information to more people, including Weather Warning and IPAWS alerts

### Rapid Alerting

CodeRED alerted residents to take cover eight minutes before a devastating EF-3 tornado passed through town, saving lives

### Convenient Communications

CodeRED alerts are quickly and easily sent from anywhere, anytime; residents can quickly subscribe via a variety of methods
