

Tornado Alley is Shifting

Are You Prepared for Dynamic Weather Risks?

Tornado Alley has always been known for most of the tornado outbreaks in the U.S. However, historical data shows an eastward shift since the 1990s.

Making **Dixie Alley** the new Tornado Alley.

57%

of all U.S. tornado reports in the first half of 2023 were in the Southeast, vs. 24% in the Midwest.

31%

of tornadoes in 2022 were in Mississippi, Alabama and Texas, due in part to rising temperatures in the Gulf of Mexico.

66%

of known tornado-related fatalities in 2023 occurred in Dixie Alley, where population density is high.
