

OnSolve Risk Insights

Historical physical threat data to make more informed risk-based decisions

The growing frequency of physical threats and their cascading impacts is creating a renewed sense of urgency for every organization — but urgency alone isn't enough. To properly prioritize managing and mitigating the impact of these risks, leaders need to know where to direct their attention and that starts with a view of historical risks.

When C-level executives ask for risk assessments or security protocol updates, or it's time for your annual threat and vulnerability assessment to meet ISO 22301 requirements, security and continuity leaders need to understand the history of risk trends. Understanding past risk helps make recommendations for allocation of security resources, evaluate real estate opportunities and protect your assets and employees — whether local, remote or traveling.

OnSolve Risk Insights

OnSolve® Risk Insights provides historical data and statistics to help organizations identify external risks and trends in geographical areas to make informed risk-based decisions and strengthen operational resilience. The key to accelerating your response and recovery is to accelerate the assessment of risk.

Risk Insights can help organizations:

Conduct Geographical Analysis

Determine where historical events have impacted operations in the past.

Identify Historical Trends

Explore patterns of historical events for improved forecasting.

Integrate Data Into Business Strategy

Create a prioritized inventory of the most significant risks.

Your Partner in a Crisis

The unified OnSolve Platform hosts a suite of products to support organizations through every step of a critical event, from preparation to detection to activating response teams and recovery.

Prepare

with risk assessments, historical trends and statistics before anything even happens.

Detect

threats early with accurate, focused alerts and impact assessments.

Activate

teams by disseminating information needed to mobilize quickly.

Recover

faster with the right technology to better understand, handle and mitigate risk.

**OnSolve Named a Leader
in the Forrester Wave™:**
Critical Event Management
Platforms, Q4 2023

How do you currently make risk-based decisions or recommendations?

Risk Insights gives security leaders a way to record, track and define risks across the organization and anticipate what may impact them. Leaders can easily integrate these risk trends into overall strategy, crisis prevention and management.

Risk Insights can help your organization identify and improve:

- Threat assessments
- Expansion opportunities and real estate decisions
- Duty of care
- Financial planning
- Employee training
- Physical security resources, allocations
- Loss prevention
- Return on investment for risk intelligence software

OnSolve offers historical reporting from the largest physical risk dataset in the industry to help security leaders make data-driven decisions. Visit www.onsolve.com to learn more.

About OnSolve

OnSolve® is the leading provider of AI-powered critical event management technology that enables organizations to proactively mitigate risk and remain agile when a crisis strikes. With powerful and reliable risk intelligence, mass notification and incident management technology, the unified OnSolve Platform allows enterprises, organizations and government agencies to prepare, detect, activate and recover from physical threats.
