

Healthcare Provider Expands with OnSolve[®] for Emergency Alerting and Employee Communications

The Challenge

A not-for-profit integrated healthcare system with many hospitals and tens of thousands of employees requires critical communications technology for emergency alerting, such as severe weather updates or active assailant warnings, as well as for sharing operational information with key staff. They evaluated solutions on the market to assess the latest capabilities available, as well as how to make their teams and operations more efficient overall.

Why Did the Customer Choose OnSolve?

Flexible, Reliable Communications

Customer has many use cases, including alerts for security, emergency management and IT; ability to add SSO, mobile and Account Portal were key

Comprehensive Reach

Tens of thousands of employees kept safe and informed with OnSolve, spanning more than a dozen hospitals across the state

Legacy of Support and Trust

Strong customer and technical support and a trusted six-year OnSolve partnership were critical factors
