You Have Options for Your
Emergency Mass Notification System

When it comes to emergency alerts, you need a reliable vendor that puts the safety of your residents first.

Trusted by government agencies since 1998 to provide real-time information that helps save lives, OnSolve® CodeRED® is now relied upon by over 10,000 customers and has assisted with more than 90,000 missing persons cases.

OnSolve pioneered the mass notification industry, and CodeRED is battle-tested, having been chosen as the statewide solution for internal and external public alerting by more than 20 U.S. states, and with thousands of implementations at agencies across the U.S. and Canada.

We Make Changing (and Staying) Easy

Implementing a new system can be challenging — but our teams have been doing this longer than any other provider and are equipped with best practices and guidance. We will be with you every step of the way with our "start-coach-care" philosophy.

Start

We know you need to get up and running quickly so you can start using your system and have employees trained. We'll work with you to understand your objectives, requirements, project scope, and goals.

Coach

We will meet regularly with you and become your trusted strategic advisor to ensure you derive maximum value from this partnership.

Care

You will have access to constant support with a dedicated Account Manager, a U.S.-based support team available 24/7 and invitations to exclusive customer training and events to keep your teams prepared.

The CodeRED Difference

Customers tell us CodeRED is the ideal fit for their communities. We know emergency managers and law enforcement require a fully functional system and an experienced, reliable provider capable of establishing a strong partnership with their agencies at the local level. CodeRED understands your agency needs:
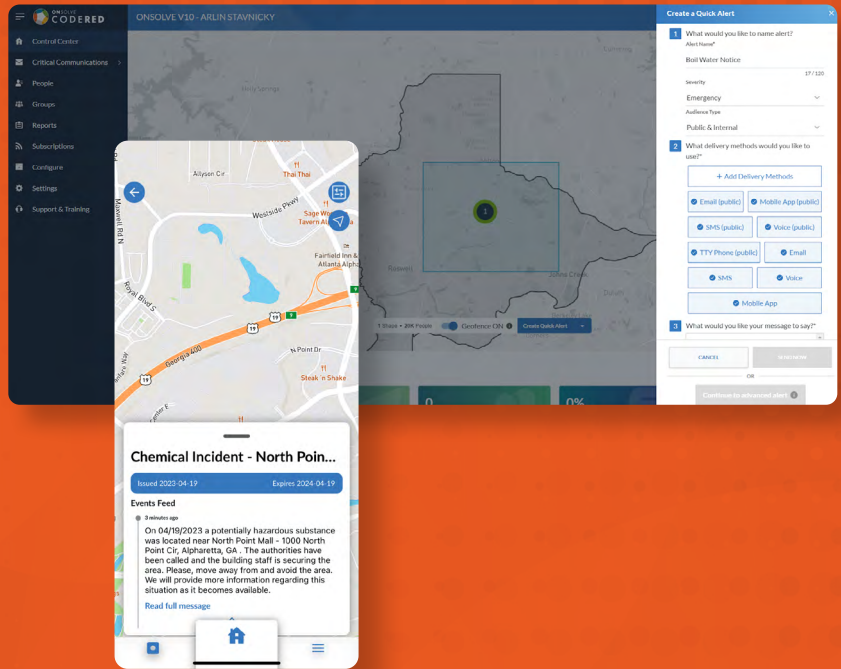

A partner, not a vendor. You're not alone in protecting your residents. Our expertly trained customer support team is available 24/7, 365 days a year, because emergencies don't take holidays.

High reliability, low risk. We continue to invest millions into our infrastructure to offer a high-speed, high-performance FedRAMP-authorized mass notification solution that anticipates your needs. In addition, we routinely collect customer feedback to contribute to our product roadmap, so we focus on the functionality that meets emergency management, law enforcement, and local government requirements.

Easy to use, scales with you. We recognize the need for functionality that caters to teams or individuals who are tech-savvy and need complex workflows but also for those that don't. Our system was designed with a former Florida Emergency Manager's guidance to help us provide what you need in an intuitive format to be used quickly and easily in emergency and daily operational situations.

Features and functionality your community needs:

✓ Geo-targeted alerts via mobile app, text, email and more

✓ Automated severe weather alerts to help residents act quickly

✓ Alert send functionality with basic and advanced workflows to use

✓ IPAWS-compliant solution built with FEMA-advisory board experts

✓ Multi-language message translation for diverse communities

✓ Public self-registration to help build your contact database
